RIESZ BASES OF EXPONENTIALS

We present some classical and recent results concerning properties of exponential families $f e^{i n t} g$ in $L^2(0; T)$: This talk would be appropriate for advanced undergraduates and graduate students.

Thursday, November 21 2013

Chapman 104

1:00 – 2:00 pm

Refreshments after the talk in Chapman 101A
