

MAE Degree

The MAE degree is a two-year program that provides a broad foundation in mechanical and aerospace engineering.

The MAE degree is available in the following concentrations:

- **General MAE**: This concentration provides a broad foundation in mechanical and aerospace engineering, preparing students for a wide range of careers in industry and research.
- **MAE with a Minor in Business**: This concentration combines the MAE degree with a minor in business, providing students with the skills and knowledge needed to succeed in the business world.
- **MAE with a Minor in Computer Science**: This concentration combines the MAE degree with a minor in computer science, providing students with the skills and knowledge needed to work in the field of computer-aided design and manufacturing.
- **MAE with a Minor in Physics**: This concentration combines the MAE degree with a minor in physics, providing students with a strong foundation in the physical sciences.
- **MAE with a Minor in Mathematics**: This concentration combines the MAE degree with a minor in mathematics, providing students with the skills and knowledge needed to work in the field of computational engineering.
