

The UAF Faculty Senate passed the following at Meeting #168, Sept. 13, 2010:

**MOTION:**

The UAF Faculty Senate moves to approve the elimination of the B.S. degree in Statistics.

EFFECTIVE:            Fall 2011

RATIONALE:        See the program proposal #00 LIPCh on file in the Governance

Office, 314 Signers' Hall.

 13 Sep 2010

departments or the Statistics M.S. program. Thus, we anticipate little impact on other programs, the personnel directly involved with the program, or the budget of the department. This change will

allow the statistics faculty to dedicate a bit more of their effort to the much stronger M.S. program in Statistics which helps provide Biometricians for the Alaska Department of Fish and Game and the

R.S. program been very small (fewer than 5) and the number of students graduating from the

program has never been more than 2 or 3 in a year.

The R.S. Degree in Statistics has no space requirements, nor any special personnel or support

service costs.
